

What to Expect After a New Filling

- Be sure that the local anesthetic has completely worn off before chewing. This is to prevent you from biting or injuring your lip, cheeks or tongue. Also, refrain from drinking anything hot in temperature or smoking to prevent burning numb tissues. Sometimes patients also find it difficult to swallow while they are still numb, so please be careful.
- Our office only places tooth colored resin type fillings. These fillings are completely hardened when you leave the office. You can eat on them as soon as the numbness wears off. Although the fillings are polished before you leave, they may feel slightly gritty at first. This should go away after a couple of days. If not please call us.

If You Have Discomfort

- This is usually from a normal reaction of the nerve following the procedure. Give it a couple of days and try a sensitivity protection toothpaste (i.e. Sensodyne or Crest for Sensitivity) until it subsides.
- If sensitivity persists beyond a week or seems to worsen please call our office.
- Discontinue the use of any whitening toothpaste or other whitening products until the sensitivity subsides.
- If your bite seems off or if you cannot bite normally please call the office to have your filling adjusted. Do not wait for it to wear down on its own as the tooth may become tender.
- If you were prescribed pain medication, use only as directed by Dr. Payne or Dr. Young.

Keep Your New Filling Clean

- Teeth with fillings can still get cavities, and in fact, are more susceptible than virgin teeth. Proper and regular brushing and flossing are a must.
- Be sure your toothpaste contains fluoride. New fillings are susceptible to developing new decay around the edges of the filling if not cared for.
- If you have experienced recurrent decay (your old filling had decay under it) or have had multiple recurring cavities you may want to use a fluoride rinse like Act or other fluoride containing rinses. There are also prescription strength fluoride paste and gels that our office can recommend. Please ask at your next visit or call us.
